FUTURISTIC

THE SILVER BEAUTY

INTRODUCTION

SILVER BEAUTY

While fashion has been known to look to the past for modern inspiration, the industry often works like a pendulum, swinging between a yearning nostalgia for a simpler time and an enthusiastic vision of fashion's meaning in a technocentric future. Enter retrofuturism. Although the late 1960s may be the most memorable era associated with retrofuturist style, its roots lie even further back in time, though it continues to find itself in contemporary fashion, evidenced by the current ubiquity of the Y2K fashion revival as well as the industry's interest in the Metaverse.

The marriage between fashion and technology can be traced back to the 1920s and early 1930s. In an era obsessed with the idea of modernity across all spaces of life, designers and artists frequently relied on gilded lamés, planetary motifs, and early experimentation with unusual materials like wood and plastic as a way of expressing their vision of the future. Even if space travel was but a distant dream, it didn't prevent couturiers like Elsa Schiaparelli from envisioning how fashion could be influenced by, and participate in, the vast possibilities offered by the beyond.

PORTRAIT CONSO

A dreamy palette of silvers, white-and-silver colour scheme, were worn with astronaut-style accessories like flat boots called ‘go-go’ boots goggles and helmets, shiny gloves.

The cosmetic industry is thriving more than ever before. The beauty business is one such cultural domain that radiates outward. Packaging design has a significant impact on customers' purchasing decisions. This is especially important in competitive industries like cosmetics, where a standout design can be the key to success.

ALIEN HEROIN

INTRODUCTION

In a society where nothing's going right any more, where the older generation no longer understands the way things are, and where the younger generation wants to break free from the rules, what can beauty offer? We can't choose our bodies, but what if we had the opportunity to do so? What if changing our bodies to look like alien creatures was the solution?

Offset : the amount or distance by which something is out of line.

Alien: a hypothetical or fictional being from another world.

Transformation : a marked change in form, nature, or

ICONES

MEI PANG

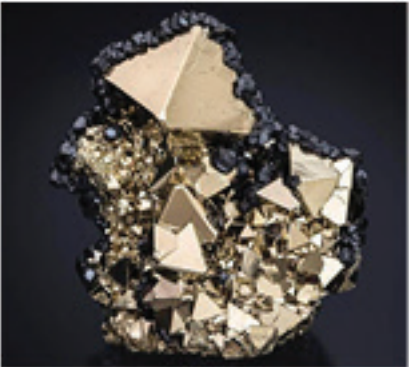

Mei Pang was born on the outcast of Toronto, she is shaking up the beauty industry by challenging conventional ideas of what beauty is. Known for her bold and technical beauty looks, shaved head and symmetrical tattoos, Mei has gained a loyal following. She does not aspire to fit any predetermined beauty labels, and focuses on creating imagery that brings her joy. Mei Pang was cast for Savage X Fenty show by Rihanna in 2021. She collaborated on beauty content for Gucci, REM, Fenty, HAUS LAB., and has been featured in Allure, Dazed Beauty, Paper,...

VALENTINA LI

Valentina Li is one of China's top makeup artists. Her science fiction and manga-inspired work has appeared in countless photoshoots, fashion shows, and Instagram posts. She is known for her use of electric eye paints and watery droplets on models' faces. In 2022, Li, who has said she prefers to call herself a "face painter" rather than a makeup artist, was named a member of Chanel's newly established Cometes Collective, a community of emerging makeup artists.

Polyester Silver Metallic

Alien Heroine has a disturbing, inhuman texture that makes the viewer feel uneasy. Holes, streaks and glitter are an integral part of the looks. The textures resemble both reptile and stone, giving an interesting perspective to dig into and have fun with.

SKINCARE

For our skincare section, we have chosen to offer Peel off masks, particularly the glitter and metallic ones, which leave the skin smooth, soft and radiant. After the mask has been applied, our face can seem to be erased, giving the impression of a creature, a rather disturbing entity.

On your collar - gloss REM BEAUTY

Liquid eyeshadows REM beauty

Few brands follow the ALIEN HEROINE aesthetic, but one stands out from the crowd: REM BEAUTY. Developed by Ariana Grande in 2021, her first «ultraviolet» collection underlines the mood of our 2026-2027 beauty trend, with sleek packaging but a futuristic touch. What makes it different is the presence of a green highlighter, an ultra-glittery violet-blue gloss or its scarab blue liquid eyeshadow.

NATURAL TRIP

NATURE & HARMONY

INTRODUCTION

Gen Z are set to live longer than previous generations and they're keen on maintaining their health and youthful appearance for as long as possible. This new mode of products guarantees products based on natural, organic, vegan products and those coming from nature in order to promote well-being and prevent damage before it occurs. . We present a range of scientifically advanced products accessible to all in terms of health and aging. All of the products are made in order to invest in products that last a long time and make this generation and others more confident. Today, skincare and well-being are a priority, spending is more on skin care products and human well-being than in any other beauty category. Gen Z advocates "less is more"

CONSUMER PORTRAIT

This type of product is generally suitable for all genres.

It is intended for individuals who adopt a way of life in accordance with nature and who manage to find a sense of daily well-being.

This category of products closes their lifestyle full of activities that stimulate their well-being, offering extra time to recharge both physically and mentally. In recent years, there has been an increase in demand for its products. There is more and more demand among men. The demand is also strong in North America, Europe and South Korea. Growth opportunities in the Middle East, emerging in LATAM.'

Packaging has been a real war in recent years. Today we advocate the health of our environment with certain innovations. We find glass packaging that can be reused for years for all types of products, and on the contrary biodegradable packaging.

COLORDREAM

INTRODUCTION

Today, we live in a society with many challenges.
We are constantly concerned about our future.
Some people lose hope, but some people use their creativity to brighten their lives.

In a world where everything becomes dark and sad people with dreams and hope use their imagination to bring back colors while trying to escape the routine.

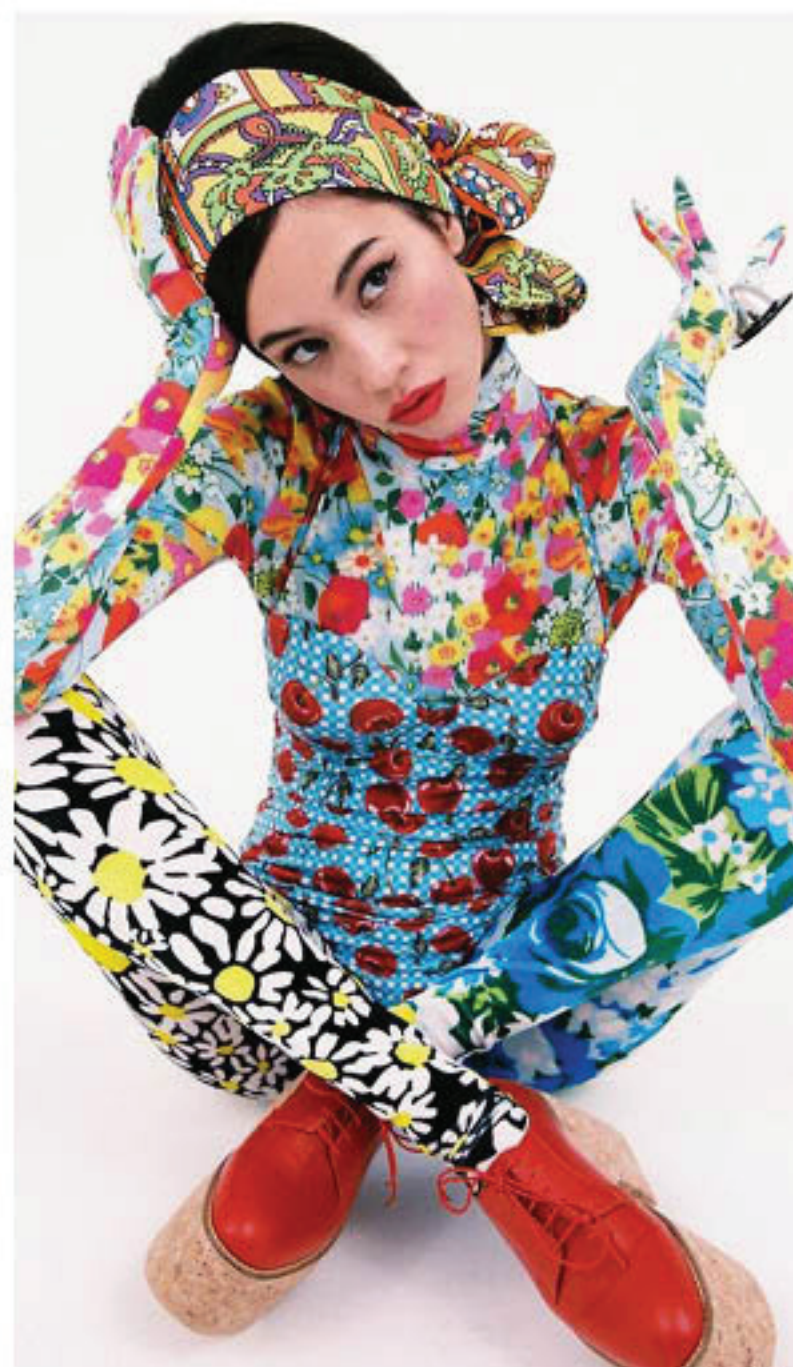

They use flashy, neon and bright colors, flowers and different imaginary creatures as if they wanted to escape our dimension.

The representation of mushrooms in coloredream is very significant. Shrooms are known to be a kind of drug that is often used to experience something close to being stuck in a universe where everything is colorful and happy.

This aesthetic is also very childish and nostalgic.
Colordreams is very influenced by the 70s with the atmosphere of flowers and mushrooms but also with the 80s with neon colors.

01

SANDY HIRALES

Sandy Hiraes is a young makeup artist. She became famous with her makeup posts on pinterst. Sandy's makeup is like decoration for your lids. It ranges from bright and colorful to festive and artistic. She often incorporates embellishments, glitter and eyeliner to take her eye makeup to the next level. For her makeup is one of the best way to express herself. The colorful colors she uses as well as the flower drawings she's often doing are her trademark.

02

JUSTINE

Justine aka @jussvphotos is a young french photographer and makeup artist. She his her own artistic director and creates different universe for each shoots she does. The universe she mostly work with is very co-lordream coded. Her work is colorful and dreamy but also kind of childish. The makeup looks she does on her models metamotphoses them into a whole new person inspired by the dreamy universe.
